

Advance High Voltage Capacitors

Advance High voltage capacitors are designed for wide range of applications such as Energy Storage, Filtering, Bypass, Voltage Multiplier and Coupling. These capacitors are Non-Inductive, Self-healing and are available either in Dry type or Partially oil impregnated construction .

Specifications:

Capacitance	: 0.003 μ F to 10 μ F
Rated Voltage	: 4kVdc to 40KVdc
Tolerance	: \pm 5%, \pm 10%
Case	: for Axial terminations - Fibre Glass tube or Yellow Wrap tape or Plastic can for Radial terminations – Metal box or Plastic box end filled with thermosetting epoxy resin
Terminals	: Screw with Bush or Flange with Internal threading or lead wires or metal strips
Dielectric	: Metallised Plastic film
Temperature range	: -40°C to +85°C

Registered Office and Factory:

Advance Components and Instruments Pvt Ltd

3A-3A/1, Belavadi Industrial Area ,Mysore – 570018 KARNATAKA

Catalog

Description	Schematic	Dimensions
3nf to 15nF 15Kvdc & 30kVdc		Fibreglass tube with Axial mounting and screw with ceramic bush terminals
0.047μF 5kVdc		19mm(d)*45mm(L) Yellow wrap tape with lead wires
0.068μF 8kVdc		48mm(d)*45mm(L) Yellow wrap tape with lead wires
0.005μF 10kVdc		14mm(d)*45mm(L) Yellow wrap tape with lead wires
0.0047μF 6kVdc		38mm(d)*60mm(l) Plastic can with Axial mounting and copper strip terminals
0.033μF 16kVdc		45mm(d)*70mm(l) Plastic can with Axial mounting and lead wires
0.5μF 4kVdc		84mm(d)*70mm(l) Fibre Glass tube with Flange terminals
4μF 4kvdc		50mm(w)*135mm(l)*150mm(h) Metal box with Screw terminals and Bottom stud mounting
0.01μF 12kVdc		22mm(d)*52mm(l) Plastic can with Axial mounting and lead wires
10μF 5kVdc		80mm(w)*155mm(l)*350mm(h) Metal box with Screw terminals and Bottom stud mounting
0.019μF 18kVdc		62mm(d)*150mm(l) Fibreglass tube with Axial mounting and screw with ceramic bush terminals
0.47μF 5kVdc		45mm(d)*110mm(l) Aluminum can with Ceramic bush and tab connectors.
